

SAICHARAN PEDDAPELLI

Software / Full-Stack Developer | Fresher

8801705149 | saicharanpeddapelli@proton.me | saicharanpeddapelli.in | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building responsive web applications and backend APIs using **HTML, CSS, JavaScript, React, Python, FastAPI, MongoDB, and Streamlit**. Developed practical projects focused on clean code, usability, CRUD operations, and efficient data handling. Seeking a fresher software development opportunity.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, C++, Java

Frameworks & Libraries: React, FastAPI, Flask, Streamlit

Databases: MongoDB, PostgreSQL

Tools & Version Control: Git, GitHub, Docker

RELEVANT DEVELOPMENT AREAS

- Frontend: Responsive web interfaces using HTML, CSS, JavaScript, TypeScript, and React.
- Backend & APIs: Application and REST API development using Python, FastAPI, and Flask.
- Databases: Database-backed applications using MongoDB and PostgreSQL, including CRUD-based data handling.
- Development Tools: Git, GitHub, Docker, and Streamlit for development, version control, and application interfaces.

PROJECTS

BudgetApp | *Web Application* | [GitHub](#)

- Designed a responsive budgeting application for managing budgets and transactions.
- Added customizable categories and spending insights to improve budget tracking and visibility.
- Focused on clear tracking, practical usability, and a simple budgeting workflow.

NoteAPI | *FastAPI, MongoDB, Streamlit* | [GitHub](#)

- Built a notes application with CRUD operations using FastAPI and MongoDB, with Streamlit for the user interface.
- Focused on performance, simplicity, and clean user interaction.
- Combined API, database, and UI components into a practical full-stack application.

PROFESSIONAL FOCUS

Interested in entry-level software development roles focused on building practical web applications, backend services, REST APIs, and database-driven solutions. Comfortable working across frontend and backend components using Python, JavaScript, TypeScript, React, FastAPI, Flask, MongoDB, and PostgreSQL. Focused on clean code, maintainable project structure, CRUD-based data handling, and usable interfaces. Interested in continuous learning and applying machine learning foundations alongside hands-on software projects.

EDUCATION

Vaageswari, Karimnagar — B.Tech in Computer Science | 2021–2025

Kendriya Vidyalaya, Karimnagar — Class XII with Python

CERTIFICATION

Machine Learning Foundation Certificate | [Certificate](#)

Gold Category | Overall Score: 76% | Issued: 03 February 2023
